EUROPE HAS TAKEN THE LEAD

Fight Against Foul Air Has Weapon Fashioned by Yankee Ingenuity. Devices for Ozonizing Atmosphere in Schools, Churches, Factories, and Theaters Become Practicable.

Chicago, April 23.-Electricity has been set to making seaside air for congested cities, the same breath of ozone that lures millions to the country, the seaside and the mountains. Turn a switch and an ozone breeze is started in a crowded school, church, office, or bank that has the vitalizing quality of the fresh air of the big outdoors. On the eve of the vacation those of us

who have no expectation of going where sea breezes blow or where mountain For more than ten years the camels zephyrs lull the city man to repose or remained at Camp Verde in idyllic idle- where the quiet of the country serves to nouncement that the latest achievement To-day Camp Verde is a thing of the of our best servant, electricity, is to do

America Falls in Line,

Over in Europe this thing has been in a hurry, because the main problems of scientists and electrical engineers in producing ozonized air have been solved by Yankee ingenuity differently and better, those of ozonizing vast quantities of air juickly and by an instantaneous contact f oxygen and electricity at high voltage. The Yankee method, known as the Vohr method," carries the generation of ozone a step farther than European methods have done. It employs a new principle in electrical manufacture, that of charging a fan with electricity, this fan discharging a cold violet glow in a ring, in passing through which the air is of stone and concrete, with walls two certain standard lines into new retail ozone. Tests have shown that the same price ranges. That seems to be the effect is silently produced as when a thing that largely explains the stamina of the country-bred man when he reaches he city-ozone which he lived in as a

known to scientists since 1840, when Prof. Schoenbein, of Basle, Switzerland, disovered it. The European scientists have devoted considerable time to its study, to the world. Europe is in the lead of

KEEN KUTTER **Lawn Mowers**

Size for size, Keen Kutter Lawn Mowers run several "push pounds" easier than other mowers. That's worth considering. It means operating energy saved and longer life for the mower-because a light-running machine doesn't wear out as fast as one that runs hard.

Keen Kutter Lawn Mowers embrace every known improvement. Castings are strong and clean. Blades are finest crucible steel, oil tempered. Bearings run on hardened steel

balls and reduce friction to practically nothing. Bed knife is firmly screwed to bed plate and instantly adjusted by the turn of a screwdriver. Handle of fine white maple with steel braces. Altogether the Keen Kutter Lawn Mower is the most perfect im-

plement made for the care of a lawn. If not at your dealer's, write us. "The Recollection of Quality Remains
Long After the Price is Forgotten."
